
FOR IMMEDIATE RELEASE: May 23, 2023

Systems Engineering & Management Company (SEMCO) Acquired by Colorado Springs Defense Consortium

Colorado Springs, Colorado, May 23, 2023: ONE Dev, LLC, a company within [The O'Neil Group](#) Company's Defense contracting consortium ([The Consortium](#)) is pleased to announce the acquisition of *Systems Engineering & Management Company* (SEMCO), a Vista, CA company and a leading supplier of state-of-the-art telemetry products and solutions for DoD test ranges, flight test centers and customers within the space, missile and launch vehicles mission areas.

Rob Patterson, President, Business Development at ONE Dev - *"We are glad to have SEMCO join The Consortium and they are already instrumental and under contract in support of Range of the Future program initiatives, and their addition fits with our strategy to have our consortium members be key contributors to this migration initiated by the Major Range and Test Facility Bases, Test & Evaluation community, and the United States Space Force's Space Lift Ranges."*

"We are very proud of what SEMCO has been able to achieve through the years and honored that our products support our Nation's assured access to space as well as testing of our national security defense and deterrent systems. Beyond the quality and reliability of our products, our customers value our unconditional and quick support over the life of our system," added Bill Tincup, SEMCO President.

Immediately following the acquisition, ONE Dev and SEMCO began implementing their strategy to grow within this market. Part of that strategy is the addition of a world class technical sales lead and subject matter expert within the range community. SEMCO is excited to announce that Pierre Bastie has joined the team as Vice President of Business Development. Pierre comes with more than 14 years of experience in the telemetry field, having worked and supported governmental test ranges, prime contractors, and aerospace manufacturers both in the US and abroad.

"I am delighted to join the SEMCO team and be part of a truly special organization, with people passionate and enthusiastic about telemetry and striving to do what is right for their long-standing customer base" commented Pierre. Under the mentorship of Bill Tincup, Pierre is responsible for spearheading SEMCO into new markets and leading the development of new product solutions and service offerings. With its previous leadership team in place, SEMCO will continue to operate under the SEMCO brand from their existing facilities in Vista, CA (HQ) and Ocala, FL.

This week, May 22-25, SEMCO is attending the [ITEA Test Instrumentation Workshop](#) at the Tuscan Conference Center in Las Vegas, NV. SEMCO is exhibiting its latest Telemetry Simulator and Receiver products and will be part of the Hands-On Lab providing real case telemetry link scenario and a tutorial on how to properly set up a TM receiver.

About ONE Dev:

Headquartered in Colorado Springs, ONE Dev is a founding member of a small business consortium (The Consortium) created by The O'Neil Group Company. Their primary focus is to grow its portfolio of partner companies around synergistic capabilities and enable small businesses to deliver "Best of Breed" defense solutions. ONE Dev also provides critical software subject matter expertise within the Integrated Tactical Warning/Attack Assessment and Space Defense mission areas. **Learn More:** <https://www.onedev.com>

About SEMCO:

Founded in 1984 by Bill and Karen Tincup, SEMCO has been designing and manufacturing various RF and wireless products for almost 40 years. The company's focus has been state-of-the-art telemetry products used for missile, aircraft and rocket flight testing including airborne transmitters, telemetry simulators, receivers, RF multi-couplers and other custom telemetry products, including Mobile Telemetry Ground Stations. For over 20 years, SEMCO has been recognized by the flight test and range community as a premier provider of "Range Ready, Range Proven" telemetry equipment and today, there are more than 3,000 units deployed and in operation around the world. **Learn More:** <https://www.semco.com>
